Supervision of the manufacture of a horizontal tank under slope

400 m³ LPG pressure vessel according to CODAP-2015 Div. 2

My duties as a construction supervisor :

- Coordination between the construction, inspection and painting teams (planning).
- Support in construction methods.
- Support in welding matters (training, documentation, auditing).
- NDT referent (checking reports, budget controller, contact with subcontractors).
- Quality control (monitoring traceability and associated documentation).
- Customer contact in the St-Nazaire workshop for progress and inspection of work.
- Hydraulic pressure test manager.
